Word Problems

Grade 5 Four Operations Word Problem Worksheet 1

Solve the equation.

1. Jackson travelled 3630 miles in 60 days. How many miles did he travel on average each day?

2. Terrance earned \$444 in March, \$523 in April and \$410 in May. He divided his earnings between himself and his 4 other workers. How much did they each earn?

3. Milly made 45 t-shirts to sell online. She sold each one for \$30 but she had to pay \$8.50 tax for each shirt. How much money did she make once she sold them all?

4. Zoe played soccer for 12 years before she retired. She trained twice a week every year (52 weeks) for her entire career. How many training sessions did she go to?
