Rounding Numbers

Rounding is important to understand. We use rounding in every day situations all the time. Instead of saying something costs \$9.95...we say it costs \$10. Rounding helps us make difficult calculations easier.

Let's work on rounding to the nearest 10.

$$72 \rightarrow 70$$

If the number is closer to 70, we round down to 70.

$$74 \rightarrow 70$$

If the number is closer to 80, we round up to 80.

$$79 \rightarrow 80$$

$$75 \rightarrow 80$$

If the number is exactly in the middle, 75, we always round up!

Rounding Numbers

Let's try some together.

3. 14 → 10

4. 55 → 60

Rounding Numbers

This time, let's round numbers to the nearest 100! It's easy and just takes practise.

Strategy

When rounding to the nearest 100, go to the hundreds place and underline the number. In this case it's the 3. You must ask yourself, "is this number closer to 300 or 400?" Of course it's 300, so we round down.

$$\underline{3}24 \rightarrow 300$$

More examples:

$$\underline{6}87 \rightarrow 700$$

$$\underline{2}44 \rightarrow 700$$

$$\underline{4}50 \rightarrow 500$$
